WHO TECHVANCE

WE ARE?

IS AN ENGINEERING-FIRST IT SOLUTIONS AGENCY IN HOUSTON, TEXAS.

BUILT TO SOLVE A SPECIFIC PROBLEM

Most business websites are just expensive digital business cards.

We saw too many local businesses trapped by slow, generic templates from Wix and WordPress sites that look okay but fail to generate leads, close sales, or rank on Google. We are here to change that.

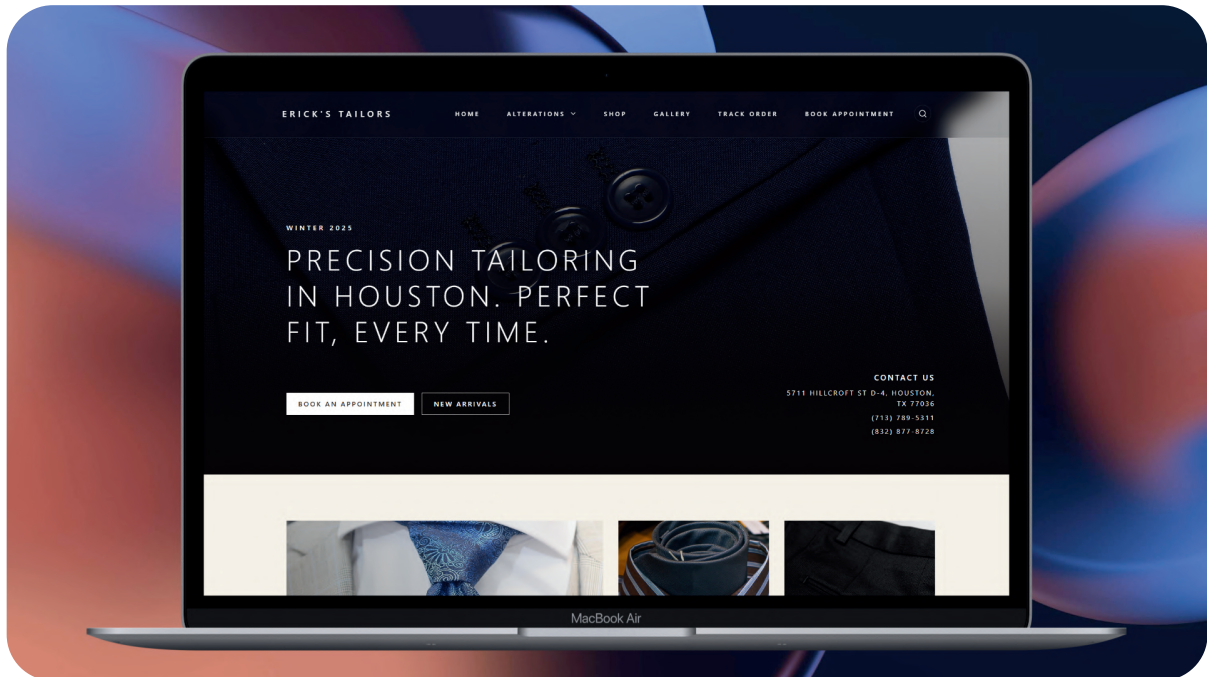

Techvance rejects the "drag-and-drop" mediocrity. We don't just build pages; we architect high-performance digital engines using enterprise-grade technology (Next.js, React, and Custom VPS). We replace "good enough" templates with custom code designed explicitly to convert traffic into revenue.

OUR MISSION

To end the era of the passive website. Our mission is to transform your digital presence from a static monthly expense into your business's most effective sales tool.

We strive to liberate Houston businesses from the limitations of bloated plugins and bad AI wrappers, providing them with secure, scalable, and automated systems that actually move the needle on their bottom line.

OUR SERVICES

SYSTEMS & INTERFACE

WEB DEVELOPMENT & E-COMMERCE

We build lightning-fast, SEO-optimized websites designed to convert visitors into loyal customers.

ESSENTIAL PRESENCE

Custom-designed sites (up to 5 unique pages) perfect for service-based businesses looking to establish credibility.

E-COMMERCE SCALE

Robust online stores (up to 12 unique pages) featuring dynamic product templates, secure payment gateways, and inventory management integration.

CUSTOM POINT OF SALE (POS) SYSTEMS

Custom POS systems designed to fit your physical retail environment and operational needs.

HARDWARE INTEGRATION

Custom "Polling Bridges" to ensure seamless communication between your software and hardware peripherals.

UNIFIED DATA

Systems that sync perfectly with your online store, ensuring your inventory is accurate across all channels.

OUR SERVICES

AUTOMATION & SCALE

HOSTING & DEVOPS OPERATIONS

Stop worrying about server downtime. We provide fully managed hosting and DevOps solutions.

SCALABLE ARCHITECTURE

Expertise in Ubuntu VPS environments ensures your applications remain stable under high traffic.

CI/CD AUTOMATION

We implement Continuous Integration/Continuous Deployment pipelines, meaning updates to your software are deployed instantly and without error.

AI AUTOMATION FOR BUSINESS

Leverage the power of Artificial Intelligence to reduce manual workload.

WORKFLOW AUTOMATION

Automate repetitive tasks like customer scheduling, email follow-ups, and data entry.

INTELLIGENT INSIGHTS

Use AI to analyze business data and predict trends, helping you make smarter decisions.
